This series publishes cutting-edge monographs and edited volumes on media from Spain and Latin America. With a broad and innovative approach to media, books in this series blend exploration of traditional media with new and under-researched media practices in order to enrich contemporary study of the media landscape. Topics covered in the series include electronic literature (digital and techno-poetries, hypertext fiction, blogs, literary experiments in social media, video games, memes, etc.), social media phenomena, media-based installations/performances, sound poetry, film, and digital humanities.

ACKNOWLEDGMENTS

This book was written over email, WhatsApp, and Zoom—appropriately enough, for a book on the topic of digital poetics. It is the product of many years of collaborative work and friendship between the editors, which emerged in and from the corner booth of the Athens, GA *sanctum sanctorum*, Trappeze.

Generous funding for this book was provided by the Department of Romance Languages at the University of Georgia and the Center for the Humanities at the University of New Hampshire. We are very grateful for their continued support.

Since this is a collective volume, we would like to first thank the critics who paved the way for this intellectual exercise as well as those who contributed their work to the book. We would also like to thank Camille Davies and her team for their tireless and excellent work getting this project—and our book series, titled *New Directions in Spanish and Latin American Media Studies*—off the ground.

SW and LCD would like to thank their families for their unflinching love, support, and patience through all projects, trials, and tribulations. A special thanks to Audrey Hansen, whose expert translation of over a dozen entries in this volume represents a strong contribution to this book.

This book is dedicated to the innovative artists whose work is featured—and those who we were not able to include—in this volume. Also, we would like to celebrate the daring of poets, scholars, students, and readers who are curious about the entanglement between literature and science/technology.
